Saint-Etienne, Novembre 20th, 2020

Object: Recommandation for M. Aninda MAULIK for an internship.

I came to know **Mr. MAULIK** when he applied and was selected, in 2019, for the International Master's programme in Computer Science, Cyber-Physical and Social System, jointly run by the Université Jean Monnet and the Ecole des Mines, Saint Etienne.

Aninda MAULIK has succeeded in the 1st year of the master programme and he has obtained good results (means of 11,5/20 to the exams, and 13/20 to the internship, in the French grading system). He is currently doing his 2nd year (results not available).

He is a very pleasant and studious student, and he makes all required efforts to achieve his goals. He is very respectful, and is able to be proactive, to ask questions, to argue his positions and to make presentations in front of an audience.

Aninda MAULIK has a number of qualities that make him a very good candidate for an internship: he has a good technical background, he is curious, he has tenacity, he is reliable, and he is a very pleasant person.

Best regards,

Pierre MARET, Professor

Head of the master's programme Cyber-Physical and Social System
